

x_make_mermaid_x â€™ Production Ledger

I log every consequential change to this storyboard engine here. Entries adhere to [Keep a Changelog](#) and Semantic Versioning so investigators can tie each SVG to the code that birthed it.

[0.20.4] - 2025-10-15

Changed

- Routed Mermaid renders through the shared `export_mermaid_to_svg` helper, emitting `ExportResult` audit signals and clear failure reasons when `mmdc` is offline.
- README tightened for the Road to 0.20.4 release to document the exporter hookup and Kanban evidence capture.

[0.20.3] - 2025-10-14

Changed

- Adjusted documentation and roadmap links for the Road to 0.20.3 release, highlighting the JSON-first storyboard updates.

[0.20.2] - 2025-10-14

Changed

- Rewrote the documentation to chart the Road to 0.20.2 storyboard expectations and hardened the guidance for the refreshed diagram pipeline.

[0.20.1] - 2025-10-13

Changed

- Updated README guidance to point at the Road to 0.20.1 control-room ledger so diagram tooling always mirrors the live cook.

[0.20.0-prep] - 2025-10-12

Added

- Documented the Mermaid factory in the control-room tone to align with the Road to 0.20.0 storytelling cadence.
- Linked the builder to Markdown, Graphviz, and orchestration hubs for unified reporting.

Changed

- Clarified expectations for diagram contributions: automate the render, log the change, and never skip the Change Control entry.
